YOUCEF BELMOKHTAR

Data Scientist | Data Analyst

youcefbelmokhtar911@gmail.com 0551963198 Algiers linkedin.com/in/youcefbelmokhtar

PROFILE

Data Scientist with hands-on experience in machine learning, statistical analysis, predictive modeling, and AI-powered automation. Experienced in developing demand forecasting workflows, applying Isolation Forest for unsupervised anomaly detection, analyzing transactional datasets, and building LLM-powered agents integrated with business APIs. Proficient in Python, SQL, scikit-learn, and data processing, with experience deploying applications using Flask, Docker, and Google Cloud Platform. Holds an M.Sc. in Quantitative Economics, with a strong foundation in econometrics, statistical modeling, and data-driven decision support, complemented by practical banking experience.

EXPERIENCE

01/2025 – Today
Remote work

Data Scientist
TweezGroup

- Developed demand forecasting workflows for 50+ SKUs to support inventory planning, procurement decisions, and stock availability management.
- Built weekly AI-powered reports to support stock monitoring, inventory analysis, replenishment workflows, and operational decision-making.
- Developed AI-powered agent integrating order-management workflows, including order creation, updates, cancellations, tracking, and transfers through API integrations.
- Built AI agents for Meta Ads and Google Ads, supporting advertising workflows, campaign analysis, and Google Search campaign management.
- Developed AI-assisted Meta Ads creative analysis workflows to evaluate advertising creatives, primary text, headlines, and messaging to support campaign optimization.
- Built Python ETL pipelines integrating Amazon, Shopify, and TikTok Shop APIs, processing transactional and operational data, and loading structured datasets into MySQL/PostgreSQL.
- Conducted exploratory data analysis on sales, orders, refunds, inventory movements, and business KPIs to identify trends, anomalies, and performance drivers.
- Developed a supplier purchasing and allocation optimization model using Python and PuLP, incorporating minimum order quantities, supplier capacity, inventory requirements, budget constraints, and logistics considerations.
- Developed an unsupervised anomaly detection model using Isolation Forest to identify unusual patterns and potential anomalies in operational data, supporting the detection of abnormal shipping fees, and order-processing issues.
- Developed Flask applications and REST APIs and deployed data applications using Docker and Google Cloud Platform.
- Created Power BI dashboards and automated reporting workflows to monitor business performance and support data-driven decisions.

04/2024 – 11/2024
Banking, Mascara

Cashier
GULF BANK ALGERIA

- Processed customer cash transactions and business payments with attention to accuracy, transaction integrity, and operational procedures.
- Verified invoices and payment documentation, ensuring consistency between supporting documents and financial transactions.
- Developed practical experience in banking operations, financial processes, and customer-facing service delivery.

04/2019 – 05/2019
Industry, Mascara

Economic studies officer (intern)
BAG MASCARA

- Prepared Excel-based reports and KPI dashboards to support operational monitoring and performance analysis.

EDUCATION

01/2020 – 07/2022
Mascara

Master in Quantitative Economics-
Mustapha Stambouli
Using econometric models to analyze historical data, trend analysis, demonstrating how external shocks (such as oil price fluctuations) impact inflation and interest rates in Algeria, leading to actionable insights.

10/2016 – 01/2020
Mascara

Degree in Quantitative Economics-
Mustapha Stambouli
Developed a foundation in econometrics, quantitative methods, statistical analysis, data science, and economic modeling.

HARD SKILLS

Languages
Python (Pandas, NumPy), SQL

Business Intelligence
Power BI (DAX, data modeling, measures, dashboards), Excel (pivot tables, advanced formulas), Excel advanced

Tools & Platforms
GitHub, Jupyter, ClickUP

Machine Learning & Forecasting
scikit-learn, XGBoost, time-series forecasting

Deep learning
Pytorch

Cloud & Infrastructure
Google Cloud, Docker, Flask, REST APIs, cloud deployment, application integration

Data Engineering
ETL pipelines, data modeling, MySQL, PostgreSQL, API integration

Statistics & Econometrics
Statistical Modeling, Hypothesis Testing, A/B Testing, Predictive Analytics, Econometrics, Demand Forecasting, Trend Analysis.

LLMs & AI Agents:
LLM-Powered Agents, LangGraph

LANGUAGES

Arab	●●●●●	English	●●●●○
French	●●●○○	German	●○○○○

CERTIFICATES

DataCamp Associate Data Analyst Certificate
[2020]

DataCamp AI engineer Associate certificate
2026

Microsoft Fabric Analytics Engineer Associate (DP-600)
2026

PROJECTS

2024 **Stroke Prediction Web App**
Machine Learning + Streamlit + HealthTech
- Built and deployed a machine learning classification model to predict stroke risk from health and demographic data, with real-time predictions through a Streamlit web app.

2024 **KetabAI – AI PDF Book Chatbot**
Python · LangChain · Gemini API · RAG · Streamlit
- Built a RAG-based AI application enabling users to query, summarize, and receive recommendations from PDF books using Google Gemini.

2022 **Rental Prices in Algeria**
BeautifulSoup · GradientBoostingRegressor
- Scraped **4,000+ real-estate records**, engineered predictive features, and trained a Gradient Boosting model to predict rental prices.

SOFT SKILLS

Team collaboration

Effective communication

Problem solving

Remote team coordination
